Product Description: Professional Email

Network Solutions Professional Email provides a customer email address that reinforces your brand and enhances your professional image, creating instant credibility and a positive first impression online.

Our web based email client provides all the great features you need to manage your day-to-day communications and schedule. Calendars, address books and tasks are conveniently integrated right into your Professional Email interface and accessible via any Internet connection.

What's New for Professional Email in v7.10.2

We are excited to tell you about the new feature enhancements you will find for version 7.10.2!

Features and Functionality

Here is a list of the new feature enhancements released in version 7.10.2:

[Next Generation Calendar Improvements](#)

[Documents Enhancements](#)

[Drive Enhancements](#)

[Mail Enhancements](#)

Next Generation Calendar Improvements

Next Generation Calendar Improvements include:

1. Organizers can now specify if participants can change an appointment or not. Additionally, the organizer role can be moved/reallocated to other participants.
2. It is now also possible to download multiple attachments from appointments.
3. Users now also have a new option that lets them define which shared, or public, calendars are to be synced with CalDAV to other devices.

Drive Enhancements

Drive Enhancements include:

1. Additional File Handling Support: display of additional Exif data of photos.
2. In addition Drive always keeps track of all file versions.
3. Users can always view, download, delete or revert to a prior version of a file at any time. In this version it is now possible to delete all previous versions of a file, in one step.
4. Finally, with this version, administrators can configure how many file versions should be saved as well as their maximum age.

Mail Enhancements

Mail Enhancements include:

1. Background Uploading of Attachments: behavior for attaching attachments to an email has been modified. Now, as soon as user adds an attachment the upload process starts in background.
2. The user can see the progress of the upload of each attachment with a small gauge on each attachment. This optimizes the user experience. A very useful side effect of this is that once uploaded the user can see a preview of the attachment.

Product Description: Documents

Documents is a high-performing, fully integrated office suite for consumers and businesses alike. It includes Text, Spreadsheet, and Presentation components that will help users improve productivity and efficiency. Documents is currently available to Professional Email Plus customers.

What's new for Documents v7.10.2

We are excited to tell you about the new feature enhancements you will find for version 7.10.2!

Features and Functionality

Here is a list of the new feature enhancements released in version 7.10.2:

[Documents Enhancements](#)

[Presentation Enhancements](#)

[Text Enhancements](#)

[Color Toolbar Enhancements](#)

[Preview Improvements](#)

Documents Enhancements

Documents Enhancements include:

1. Edit Documents in New Browser Tabs -- to allow simultaneous document editing, and multitasking, documents are now edited in a separate browser tab.
2. The different browser tabs can now easily be arranged so that they can be viewed side by side. This makes editing an email and/or different documents together much easier.

Presentation Enhancements

Presentation Enhancements include:

1. With the new alignment guides in Presentation it is now easier to create more professional looking presentations.
2. The new guides help to place objects on slides more precisely and with better alignment

Text Enhancements

Text Enhancements include:

1. Check spelling in different languages. Now if a document contains texts in different languages, other than the one that is normally used, there is now an easy way to change the spelling language via a context menu

Color Toolbar Enhancements

Color Toolbar Enhancements include:

1. The toolbar icons to change the color of text, cells, borders, etc. has been updated.
2. The toolbar icon now shows the last used color and not the color of the cursor selection. With this change, the user can easily apply the same color without having to use the dropdown.

Preview Improvements

Preview Improvements:

1. Office documents are now pre-converted to a PDF format automatically on upload. This means that viewing a document is now even faster, because the conversion to PDF is already done.
2. Additionally, office documents sent as email attachments are also pre-converted to PDF. This allows for the faster viewing of attachments.

Product Description: Guard

Guard is a PGP-based security add-on to your email service. It seamlessly integrates into all webmail applications and enables users to encrypt emails and files easily. Advanced security options are available for professional and experienced users. Guard is currently available to Professional Email Plus customers.
