Product Description

Network Solutions Professional Email provides a custom email address that reinforces your brand and enhances your professional image, creating instant credibility and a positive first impression online.

Our web-based email client provides all the great features you need to manage your day-to-day communication and schedule. Calendars, address books, and tasks are conveniently integrated right into your Professional Email webmail interface and accessible via any Internet connection.

What's New for Webmail v7.8.4

We are excited to tell you about the new feature enhancements you will find for Webmail version 7.8.4!

Features and Functionality

Here is a list of the new feature enhancements released in version 7.8.4 for Webmail:

- [General Improvements and Design Changes](#)
- [Mail Enhancements](#)
- [Contact Enhancements](#)
- [Calendar Enhancements](#)
- [Drive Enhancements](#)
- [Settings Enhancements](#)

General Improvements and Design Changes

General Improvements and Design Changes include:

1. Improved 3rd-Party Account Handling—Subscription dialogs are consistent with large icons in all modules. Configure multiple accounts for each 3rd-party service.
2. Address Book Selector—Also available for **Distribution Lists, Appointments, Tasks, Scheduling View, Permission** dialog, **Sharing** dialog.
3. Improved Folder Selector—Improved to simplify certain workflows and make it possible to create a new folder as the targeted folder from within the folder selector.
4. Consistent Resize Behavior—Resize functionality to the list views in the **Address Book, Calendar, and Tasks** modules.
5. User Feedback Dialog—Users will have the ability to provide feedback on the webmail application.

Mail Enhancements

Mail Enhancements include:

1. Start Presentations from within Mail—View or present slides received via email directly through the Mail module without having to navigate to Drive or Presentation (for users with these modules enabled).
2. Mail Address Overlay—A small overlay in the list view allows users to hover over a displayed name and instantly see if the email is *trustworthy* without opening it.
3. Reply to Mailing List Confirmation—An optional **Confirmation** dialog will display if users reply to an email received through a mailing list.
4. Conversation View Sorting Options—Users can choose to use conversations with all available sort options.
5. Improved List and Horizontal View—A paperclip icon appears to indicate an attachment.
6. Drafts Created on Logout—Drafts are periodically saved during creation and a draft copy of unfinished email is automatically saved on logout.
7. Drafts as Templates—A new function called **Edit Copy** in the toolbar of the draft folder creates a copy of a selected email and open it in editing mode.

Contacts Enhancements

Contact Enhancements include:

1. Print View for Contacts—Additional printing options for contacts are available.

Calendars Enhancements

Calendar Enhancements include:

1. Improved Appointment Conflict Dialog—Now supports keyboard navigation and is fully accessible.
2. Improved Edit Recurrence Dialog—A new dialog has been introduced to define a recurring pattern for an appointment or task and provides summary text of the recurrence pattern.

Drive Enhancements

Drive Enhancements include:

1. Slide Show for Photos—Users can start a slide show for pictures and images in a selected folder in Drive.
2. File Type Thumbnail in Icon View—The drive displays the type of thumbnails in the icon view to easily identify files of the same format.
3. Sharing Dialog—The **Sharing** dialog to invite guest users has been improved.
4. Link Handling of Files—The filename within the detail view of the drive provides an internal link.

Settings Enhancements

Settings Enhancements include:

1. Text Configurable for Mail Compose—It is possible to define a default font, font size, and color which will be used as the default when composing new emails.
2. Editable Primary Account Name—User can define a custom name to be displayed in the email list on the email account settings page for their primary mail account.
3. Active Signature—Default signatures are highlighted by area of use.
